

## Summer work: EPQ Drafting ideas

### Name:

Over the summer complete the following course from the University of Bath:

<https://www.bath.ac.uk/campaigns/taking-the-epq-to-strengthen-your-application/>

There are **three worksheets** to accompany the course found after these instructions. These need to be completed and handed in in September.

### Current A level choices:

### What would you like to write about?

Draft a question you would like to investigate for your EPQ. Think about:

- How your EPQ may fit with a possible career path
- An aspect of a subject area which you might like to study at university
- Development of work from your A-Level courses; your EPQ must not duplicate work you have done or will do for your A-Level courses. It can, however, build on something you did at GCSE or any of your outside interests
- A current topic of interest

### What topic would you be interested in researching? Or do you have an idea of what artefact you'd like to create?

(E.g. a particular sport or hobby, a topic within a subject, something relating to your chosen future career or something you feel passionate about etc.)

### What specific question will you be asking?

This needs to be something with an argument on more than one side. If you are creating an artefact, who is it aimed at and/or what is its purpose?

### What smaller sub-questions will help you answer your main question?

**How might you research the answer to your question? What useful websites, books, magazines or other resources are there to help you?**
