

Psychology Summer Work for A Level and IB courses

Please register for Research Digest on the British Psychological Society website (<https://digest.bps.org.uk/>). You will gain access to a wealth of current research articles. Choose two articles to print off and write a brief summary of each. Bring them to your first Psychology lesson where we will be using the research you have chosen for our introductory activities. Choose articles that interest you the most!

You may also find the following reading list useful (and interesting) as an introduction to how Psychology can be used to gain information about everyday behaviour as well as abnormal behaviour:

[Mistakes Were Made \(But Not by Me\)](#) by Carol Tavris and Elliot Aronson

[Thinking, Fast and Slow](#) by Daniel Kahneman

[Blink](#) by Malcolm Gladwell

The Tell-Tale Brain: Unlocking the Mystery of Human Nature by [V. S. Ramachandran](#)

[The Man Who Mistook His Wife For A Hat](#) by Oliver Sacks

There are many more, but these are enjoyable and fascinating to read.
